Pears! Pears! Pears! Bartlett Pears for Sale by the box. Whitman's Hardware.

E. K. Clendenning and H. C. Hutton and wives returned Tuesday from their two week's auto trip to San Diego and the south. They report a most enjoyable trip. They crossed over into Mexico and back without a mishap.

Move to Oregon

E. Bundy has sold his home on Sunnyside to C. W. Wells of Long Beach, the sale being made thru B. O. Curry.

Mr. and Mrs. Bundy will leave this week for The Dalles, Oregon, where Mrs. Bundy's daughter, Mrs. B. C. Kenyon, now lives.

Ellen Brown Fablinger

Mrs. Ellen Brown Fablinger, daughter of the famous abolitionist, John Brown of Harpers Ferry, passed away at her home, 475 North 14th St., San Jose, Monday morning.

The family had moved from Campbell but the week before and the news of her death was a decided shock to their many friends who had heard favorable reports as to Mrs. Fablinger's health.

She was the youngest daughter of John Brown and the last to pass away. She was born at Akron, Ohio, September 25, 1854. John Brown that year moved to North Elba, N. Y., where they lived until 1863, when Mrs. Fablinger with a brother, two sisters and mother moved to Iowa. In 1864 the family moved across the plains and mountains and desert in ox-train finally settling at Red Bluff this state.

Being then 10 years old, Mrs. Fablinger attended school, where her late sister, Sarah Brown, was a prominent teacher. In 1870 the family moved to Rohnerville, Humboldt county and in 1876 the deceased married James Fablinger. Eleven children were born, six of whom still live. In 1881 the Fablinger family, accompanied by Mrs. Brown and Sarah Brown, came to Santa Clara county locating near Saratoga, coming to Campbell in 1902.

Mrs. Fablinger's passing is deeply mourned by a large circle of friends and acquaintances. She was a woman who endeared herself to all who met her because of her sterling qualities of graciousness, sympathy and sincerity. Those of her immediate family who are left to grieve her loss are: Her husband, James Fablinger of Campbell, Cal.; daughters, Mrs. C. D. Le Seur of Hersford, Arizona; Mrs. Frances Swane, Mary and Vera Fablinger of Campbell and a son, James Fablinger of the latter place. She was the sister of Mrs. Annie B. Adams of Petrolia, Cal., and of Salmon Brown of Portland, Ore.

Funeral services will be strictly private and will be in charge of the Curry & Gripenstraw Undertaking company, with interment in the family plot at Saratoga.

Local and Personal

Quality stationery at Smith's.

Prof. J. H. Graves has been elected principal of Monterey Grammar School.

E. O. Evans and family motored to Capitola from Aromas Sunday for the sea air.

Mr. and Mrs. Bersinger of San Juan visited the R. G. Archibalds at Capitola Sunday.

Miss Grace Bohnett was brought home from the hospital Tuesday much improved.

The W. L. Douglas and other good dress Shoes for Men $3.50 and $4.00 at E. E. Sower.

Mrs. C. T. Fawcett spent the week-end with her daughter, Mrs. H. C. Smith, at Capitola.

Mrs. P. B. Payne entertained Mrs. Leona Neff and Miss Abbie Payne of San Jose at dinner Tuesday evening.

Mrs. A. A. Hall and two children are here from Plumas county visiting Mrs. Hall's parents, Mr. and Mrs. E. E. Phelps on Sunnyside.

Mr. and Mrs. Chas. Brown of Slater, Mo., arrived last week to visit Mr. Brown's father, Grandpa and the D. S. Thompson family, for two weeks.

The T. L. Mendel family, accompanied by Miss Emma Swope, motored to Capitola Sunday to spend the day on the beach with the other Campbellites.

Mr. and Mrs. Arthur McCoy and son, Harry went to Newman last week after a sojourn at Santa Cruz. Harry's hay-fever and ocean breezes didn't agree.

Jacob Binkerd, of Co F, 13th Iowa veteran volunteers who has been very ill at his home on North Central is reported some better under the care of Dr. Cooper.

Carrier W. L. Dowton and family are enjoying a week's vacation at Twin Lakes. During Mr. Dowton's absence Karl Bohnett is substituting on the mail route.

Walter Smith of Imperial and Miss Sinner of Castleton, North Dakota, called on friends in Campbell Tuesday. Walt was returning from his vacation in Lassen county.

Mr. and Mrs. Herbert Shadel of Turlock were guests of Mrs. Shadel's sister, Mrs. R. H. Hyde last week. On Saturday they with the small sons who have been here for several weeks went to Seabright for ten days at the seaside.

Lewis Beacock and Florence Mann were married in Santa Cruz, Friday. Both young people are well known in Campbell where they attended High School. They will go East with the W. L. Beacock family and make their future home there. Best wishes go with them.

"Boss" Surprised

A very pleasant evening was spent at the G. C. Bradford home Friday evening. The base-ball boys surprised their manager, Mr. Bradford, by walking in on him en-masse with their refreshments. He with Mrs. Bradford were calling on Mr. and Mrs. J. E. Olds but a hurry-up call was sent him which brought him on a home run.

The time was spent in ball talk and stories supplemented by "busts" of song.

After a service of refreshments of candy, nuts, ice-cream and cake the boys made their "get-a-way."

Home from East

Dr. and Mrs. W. I. Merrill and children arrived home from Maine Monday morning. They had expected to sooner but were delayed almost a week at various points for inspection by health bureaus. They were held at New York for three days while undergoing the tests. All are glad to get home and Doctor has been literally pining away for lack of some home grown apricots.

While away Doctor took three weeks post graduate work at the 2nd avenue school in New York City, giving particular attention to diseases of women and children. He also saw numerous cases of infantile parlysis most of which ended fatally or in terrible forms of paralysis.

California Industrial Record

Bakersfield is in line for a beet sugar factory.

Richmond—spends $507,280 in street work in the past year.

Kennet—Corporation department of California grants Shasta National Copper Co. permit to sell $2,300,000 stock, which will mean added payrolls.

El Monte—$157,000 bridge over San Gabriel river here practically completed.

Visalia to build three new schools at cost of $105,000.

Eureka—Bid of local contractors for 4.3 miles of road between Loleta and Beatrice approved. This will be Humboldt's first paved road.

Redwood—Two buildings going up at cost of $110,000.

Pomona—American Sugar Beet Factory at Chino to open soon.

Santa Ana—$20,000 to be spent in building Fullerton Union High School.

Nevada City—Electric plant and twenty stamp mill to be built at Ocean Star Mine near Ormonde.

During year ending June 17, California broke the record for fruit shipments. The Southern Pacific alone handling about 400 cars a day for points outside here.

Downey—Masons will build $10,000 building here.

Colton—County will build $100,000 hospital.

San Francisco bank clearing week ending July 15 were largest in history.

Assessed valuation of Los Angeles Co. property is $802,081,075.

Moving picture house seating 3240 people and one of finest in world to be built in San Francisco.

Athletics Win

Our boys defeated Mayfield at Mayfield last Sunday afternoon in one of the fastest games ever staged in the Santa Clara valley, it being played in the record time of 1 hour 35 minutes and the score 1 to 0.

The ball was only hit safely seven times in the entire game and only one ball was hit to the outfield. Campbell scored in the 8th. Pierce hit a fast one to pitcher who booted thereby allowing "Busher" to occupy first sack. Kennedy followed with a safety thru short. Pierce going to third and Pat gaining second. On a squeeze play, and a wild pitch by Grieb, Pierce crossed home plate, with what proved to be the winning run. Altho our pitcher walked Mayfield's first man up in ninth, and the second up got on thru an error on part of our short stop, the boys tightened up like the proverbial "big bass drum" and held our hosts to that big round goose egg that all ball clubs prefer to give a wide berth. Hits were scarce, very scarce. Out of three made by our Club McKenzie grabbed two and Pat Kennedy one, all the balance of the boys having to content themselves the most of the time with "whiff, whiff, whiff"—

Score by innings:

	1	2	3	4	5	6	7	8	9	R	H	E
Campbell	0	0	0	0	0	0	0	1	0	1	3	4
Mayfield	0	0	0	0	0	0	0	0	0	0	4	6

Time—1 hour 35 minutes.

Umpires—Barber and Phefer.

Attendance—750.

Our boys play at Los Gatos Sunday, July 30—2:30 p. m.

SPECIAL ANNOUNCEMENT

Del Monte Peas at a Lower Price

Owing to a reduction in the wholesale rates we can now supply our customers with Del Brand Canned Peas at the price of 2 cans for 25c. This popular brand of peas has been selling at 15c straight heretofor. We have the new pack in stock and you are sure to be pleased with them.

A Kit of Fresh Peanut Butter just in—the kind you like—15c a pound.

Heinz Canned Sphagetti Reduced in Price—the 15c cans now 10c, the 20c size now 15c. (Not a cut price, but a manufacturer's reduction)

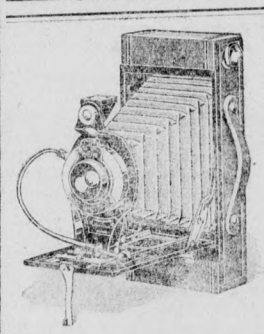
Oregon Cheese Is Just Right for those who like a medium flavor. 25c a pound.

Something New—California Cheese in a small whole cheese, family size. 50c each. An extra fine quality.

Extra High Grade Pure Cider Vinegar and Malt Vinegar

We wish to call attention to our high grade Pure Cider Vinegar, and our White Malt Vinegar. Both of these vinegars are guaranteed under the pure food law to be free from chemical adulterations. Now that pickling season is at hand you will want the best vinegar that the market affords. We believe that we have the kind you are looking for. The price is 10c a quart, 30c a gallon.

Blaine's GENERAL MERCHANDISE



Something New

Latest Antiseptic Tooth Brush Holder. Keeps the Brush Clean and Sterilized.

A New Tooth and Mouth Wash at the

Orchard City Drug Co

We guarantee the milk we sell you perfect protection from dust and dirt, right up to the time you use *the last drop*.

We have adopted

The Sanlac Seal
—IT KEEPS MILK PURE.

It ably protects the milk—pure when it enters the bottle—from shifting dust, contact with finger or fork and from all germs.

The San Lac Seal has an ample finger hold that is *not* the part that touches the milk, but which extends over and protects the mouth of the bottle.

Send us a postal and we will send a man to explain it without your incurring any obligation.

FAMOUS OLD MOUNTAIN

ARARAT HAS A CONSPICUOUS PLACE IN HISTORY.

Center of Troubled Land Where Peace Is a Comparatively Unknown Quantity—Proud Record Claimed by Armenian Race.

"Mount Ararat, where there has been hardly a moment's peace since Noah and his ark grounded upon its massive shoulder, is at present the huge, troubled boundary mark between the Ottoman empire and Russia, and under the shadows of the historic peak the fighting lines of Osmanli and Russian have been swaying back and forth, never far beyond the lines of the frontier," begins a bulletin issued by the National Geographic society.

"Ararat is the hub of Armenia, of the original home of the Haik people. It is also the center of what has ever been the most troubled area on earth. Tribes of Europe and of Asia have fought each other here from the dawn of history, and the remnants from the battles have settled as neighbors, hating, despoiling, massacring one another.

"Ararat is one of the most impressive of earth's mountains, for it rises sheer to the clouds out of an immense plain.

"The dominant mountain is split into two peaks, Great and Little Ararat. Great Ararat rises to a height of 17,000 feet above the level of the sea. Little Ararat, where the boundaries of the Ottoman empire, of Russia and of Persia meet, reaches an altitude of 12,840 feet. Though the snow line here is very high—14,000 feet—the dome of Great Ararat is covered with glitering fields of unbroken white.

"A vast wealth of legend surrounds the mountain, which has always deeply impressed the imaginations of the peoples who have wandered, passed or settled beneath it. The Armenian priests long believed that the wonderful mysteries of its summit might never be surveyed by human eyes, and all thought of scaling Ararat was considered almost in the light of sacrilege.

"The Armenians have also held that they are the first people after the flood, the immediate descendants of Noah, so to speak; for the first village that Noah founded after abandoning the ark was Nakhitchevan. So the Armenian thinks that his people were the first race of men to grow up in the world after the flood.

"The name Ararat means 'high.' The Persian name for the mountain Koh-i-Nuh, means 'Noah's mountain.' It has been determined by the natives that the Garden of Eden was placed in the valley of the Araxes.

"Noah's wife was buried in this valley near the mountain, and grapes are still grown there whose vines are the direct descendants of vines planted by Noah."

Hertzian Waves.

Hertzian waves are electric waves, so called from Heinrich Hertz (1857-1894), a German engineer and scientist, who first demonstrated the possibility of wireless telegraphy. In the course of his investigations he demonstrated some new principles regarding the transmission of light and electricity, and his premature death was regarded as a distinct loss to science. Wireless telegraphy is sometimes called Hertzian telegraphy. The present Marconi method of telegraphing without wires is by means of "Hertzian waves," which pass through the ...e medium that fills all space, ...ins after air has been ex... The apparatus generates ...ts these waves, the exis... ...eration of which were ...ted by Hertz.

HELL ROARING CREEK

IDAHO NATIONAL PARK, "the Switzerland of America," is shortly to take its place as one of the greatest natural show places on the western half of the continent. This wonderland of mountains, lakes, streams and forests in the heart of Idaho is to be set apart and dedicated for all time as a pleasure ground for the people of the whole country. It is to be added as an additional jewel to that strand that reaches from Colorado to the Pacific coast, writes M. F. Cunningham in the Utica Globe.

All America is interested in this for the reason that all the great parks of the West, including the Rocky mountain in Colorado, the Yellowstone in Wyoming and Idaho, the Idaho in the Sawtooth mountains in Idaho, the Glacier in Montana, the Yosemite in California, the Grand Canyon in Arizona and others of lesser note are to be connected by a system of fine automobile highways. Good roads and trails are to be constructed in the parks and good hotel and camping facilities are to be provided for all tourists.

There are no large glaciers in the Sawtooth mountains, but aside from this there is no scenery in America more beautiful, wild and varied. It beggars description. Senator Borah, after a hurried tour of the park last summer while home on his vacation, said:

"Force seems to sit incarnate here and one feels, somehow or other, that he is not far from the breeding ground of hurricane and storm."

Geographer Marshall's Tribute.

Mr. Marshall, the chief geographer, was equally impressed after making his tour of inspection in October. In the course of his report he said:

"This section of the Sawtooth range is unusually striking in mountain sculpture and is a brilliant composite example of the characteristics of three of the main mountain ranges in the United States. The southern portion strongly resembles the Rocky mountains in Colorado; the middle section is a counterpart of the Sierras in California, and the northern end is a rugged brother of the Cascade range in Washington. The lakes are rare in their brilliant transparency, reflecting the mountains and the black pine fringing their edges, making most inviting places for campers and tourists to rest and enjoy nature in all her glory."

The mountains in this section are bold, jagged and precipitous. From a distance the range gives the impression of a great inverted crosscut saw, hence the name. Mount Hyndman, the highest peak in Idaho, 12,078 feet, is found here within easy reach of the end of the railroad at Ketchum. The wild and grotesque mountain scenery on all sides leads all travelers to compare the country with the Alps in Switzerland.

Three rivers of inestimable value for irrigation in the valleys far below have their common source in the mountains of the proposed park. They are the Salmon, the Boise and the Payette. These streams, together with a number of smaller ones, swarm with trout and other game fish. This is equally true of the lakes, some sixty in number. The redfish, found in but few places on the continent, is common here. It has given its name to the largest of the lakes.

Streams Full of Salmon.

David Starr Jordan, speaking for the United States fish commission in a recent report, tells how the Chinook and Colorado river salmon ascend the streams, shooting the rapids and leaping the falls, until they reach their favorite spawning beds in the headwaters of the Salmon river in the Sawtooth mountains of Idaho, more than 1,000 miles from the sea. Professor Jordan lays special stress on the value of these ice-cold mountain streams to the salmon industry of the nation. Among the wild animals to be found in this section are the mountain sheep and goat, elk, moose, antelope, deer and bear, including the silvertip, the cinnamon, the brown and the grizzly. The preservation of the fish, birds and animals is one of the considerations leading to the creation of Idaho national park.

Much of the land to be included in this new national park is now included in forest reserves. Forest rangers have already done much in the way of constructing roads and trails. They have their stations well scattered throughout the territory with telephones here and there, so that the tourist, even when completely swallowed up in this wilderness, is never far out of reach of civilization.

All western states are just now putting forth tremendous exertions in the way of building good roads. The automobile tourist has come to be an important factor in the development of the country. Idaho is not behind her sister states of the West in this matter. Good work has already been done on an automobile road to connect Yellowstone park with Idaho national park, and on another scenic highway leading from the Idaho national park into Boise, the capital of the state. This last link is to be 75 miles in length, much of the way along the Boise river. Another road is under construction from the park down the Payette river and through the Boise basin, from which it is claimed $300,000,000 in placer gold was taken in the early '60s when the nation was in the throes of Civil war.

In the construction of these roads in Idaho the federal government, the state through its highway commission, the counties and numerous highway districts are co-operating. The state is also working its convicts on state highways with excellent results.

FINGERNAILS DENOTE HABITS

Owner Either Is a Sloven or Is a Very Hard Worker.

Although the eyes may be the windows of the soul, the fingernails constitute the front porch, and when one enters a neighbor's home he generally pays more attention to the porch than he does to the windows, during his brief wait upon the threshold, says the Omaha World-Herald.

Dirty fingernails indicate one of two conditions—that the wearer is a sloven or a mighty hard-working person.

There should be sympathy for the laborer who has to work around with a lot of dirt and grease and other disagreeable stuff that gets beneath his fingernails and pretty nearly baffles eradication, but the ordinary business man or housewife whose nails are not clean is likely to suffer a reverse in estimation at the hands of his or her acquaintances.

As breeding places for germs the fingernails are delightfully equipped. Hence it is well that in the public schools the teachers see to it that the youngsters are compelled to keep themselves clean in this respect, if their parents have been negligent therein.

Too Enterprising.

"Japan is getting very progressive in her imitation of Occidental civilization."

"Yes; I wouldn't be surprised if they took to canning their live fish out there."

Mark Twain "Dandy" But Also a Student In His Pilot Days

Old pilots of that day remembered Samuel Clemens as a slender, fine-looking man, well-dressed, even dandified, generally wearing blue serge, with fancy shirts, white duck trousers and patent leather shoes. A pilot could do that, for his surroundings were speckless, says Albert Bigelow Paine in St. Nicholas.

The pilots regarded him as a great reader—a student of history, travels and the sciences. In the association rooms they often saw him poring over serious books. He began the study of French one day in New Orleans when he discovered a school of languages where French, German and Italian were taught, one in each of three rooms. The price was $25 for one language, or three for $50. The student was provided with a set of conversation cards of each, and was supposed to walk from one apartment to another, changing his nationality at each threshold.

The young pilot, with his usual enthusiasm, invested in all three languages, but after a few round trips decided that French would do. He did not return to the school, but kept the cards and added textbooks. He studied faithfully when off watch and in port, and his old river notebook, still preserved, contains a number of advanced exercises neatly written out.

POULTRY NOTES

Do not be continually disturbing the sitting hen or turkey, or duck or goose, but leave them pretty much to themselves and they will make a better job of hatching.

Turkey roosts should be located toward the roof, allowing only ample space for the birds to stand erect.

Don't be afraid of overfeeding the ducks. They should be fed four or five times a day.

Good water is a necessity at all times in the poultry yard, and don't forget the loose, dry earth for the dust bath.

Ducklings and goslings should never be allowed to swim, even in warm weather, because it will set back their growth.

Be sure that the hovers in the brooders are cleaned every day and disinfected once or twice a week.

After the chicks are a few days old a run out on clean green grass in the open air every fair day is necessary for their health and growth.

Chicks with hens or in brooders should have ample indoor run so that they can secure plenty of exercise during bad weather.

Ten turkey eggs may be set under a good five-pound hen.

All portable chicken houses should be elevated to keep out the rats.

"Keep Busy," Advice To Those Who Would Reach Ripe Old Age

A number of well-known persons who have passed the allotted three-score-and-ten period all have a defense against old age. Hetty Green, the world's richest woman, says: "The best advice I can give those who live to an extreme old age and still retain their mental and physical health is to keep the mind occupied on some business endeavor, walk as much as you can and chew a baked onion between meals."

Chauncey M. Depew says the reason he is so well at eighty, is because he keeps busy. "My universal observation has been that men who have led active lives and who stopped work when they arrive at eighty years or thereabouts, died, while those who continued at their tasks lived for many years more."

Mrs. Thomas Whiffin, who has passed her eightieth year, says early to bed and early to rise makes old people young. Charles R. Flint, the well-known captain of industry, says that sunshine and not moonshine is the real thing.

CAMPING TRIP BEATS HUSBAND HUNTING ON PIAZZA OF HOTEL

By LAURA JEAN LIBBEY.

(Copyright, 1916.)

Something there is more needful than expense,
And something previous even to taste.
'Tis sense,
Good sense, which only is the gift of heaven,
And, though no science, fairly worth the seven.

If nine girls out of ten could have their way about it, no one should accuse them of going husband hunting under the pretense of leaving home for a summer outing. They would go in for a season of camp life with all its free, life-giving joys, letting the girls who dawdle around hotel piazzas catch the weak fish who are as eagerly intent upon heiress catching.

It's only within a very few years that girls have gone in for camp life during their vacations. There are a dozen good reasons to champion it. In the first place, there's no fine, expensive new wardrobe to buy. The winter's half-worn-out blue serge skirt, with a few dark shirtwaists, and the winter's thick-soled walking boots, a sweater and wool tam o'shanter cap, with a few needful accessories, constitute the wardrobe outfit. A crowd of happy, exuberant young girls, under the care of a genial woman of middle age, can enjoy a season of camp life just as heartily and thoroughly as young men can.

The exhilaration of outdoor life puts a wonderful amount of vim in girls even languidly disposed. There's a newness in responding to the tin horn which means up and out at five o'clock in the morning. The camp is always pitched near a brook and the way the girls make a dash for it for their morning dip makes an experienced sprinter open his eyes with amazement. Oh, the joy of dashing and splashing the face in that cool, sparkling brook water.

The girl who could only take chocolate, toast and an egg the first morning after her arrival could eat a whole chicken and all the good things that go with it after she has led the exhilarating life a week. In camps where money is not considered, a cook is taken along, but where young girls must count their pennies each girl takes her turn at getting the meals, showing how expert she is in the culinary art, and she is pleased to do it.

There are marching trips to some good farmhouse every day or so, which means all the milk they can drink—gratis usually—and as many fine vegetables for a dollar or so as they can carry back with them. They are such fine, healthy, happy girls when they break camp and come home! No wonder they get, without trying, the good, sensible husbands the hotel girls angled for in vain.

Window Washing Science In This Big Steel Mill

There are 3,000,000 window panes in the Bethlehem Steel company's mills, and formerly these windows were washed at irregular intervals by men who worked on day wages and did whatever amount of labor they chose. Today the company has charts of all those windows and, by experiment, has determined the time and the number of men needed to wash the glass in each building. The work is standardized. The price set for washing the windows in one of the immense machine shops is $443. The work is now done on schedule, the windows are kept clean (for steel mills), and the increased light inside has a perceptible effect on production. The cost is about one-fifth what it formerly was, per unit of window space.

Making a Room Look Cool.

Everybody has noticed that some houses look cooler in summer than others. Upon examination it will generally be found in the house which always looks cool and livable that for one thing there is no heavy stuffed furniture that has to be covered up each summer. No room looks cozy and comfortable with all the furniture shrouded in those tan-and-white-sriped covers that many people think they must put on in June.

Nor can a room look cool and homelike with long bare windows. Instead of heavy lace curtains that must be washed painstakingly each spring, stretched on a frame and put away till fall, there may be used plain hemmed or hemstitched curtains made of cheesecloth. They are as easy to wash and iron as a tea towel and they cost so little they can be easily replaced when they wear out.

STAR OF MOVIE SERIAL

Ruth Roland.

Star in "The Red Circle," a Pathe serial which has been one of the biggest attractions of the movie world.

Here and There.

It is estimated that one seed of cotton, given the application of all possible care and skill, would produce 40,000,000 seeds in six years.

To enable a physician to carry medicines without using a customary case a cane has been invented in which there is a tubular metal slide to hold vials.

Air sirens for short distance signaling have been invented by a French man and, mounted on the masts of ships, have been heard as far away as two miles.

Glass that will not splinter when broken is being made in France by pressing together under heat two sheets of glass with a sheet of celluloid between them.

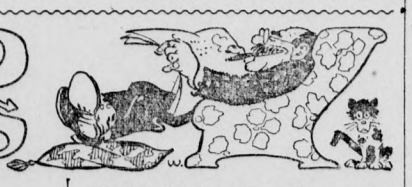
An ingenious new guard for finger rings is worn inside a ring and presses against the finger to prevent it turning, at the same time being almost invisible.

It costs Paris nearly $100,000 a year to care for the trees on its streets and boulevards and in its parks, more than 1,000 new ones being planted annually.

Refurbishing the Couch.

Don't be discouraged if your couch cover seems hopelessly soiled. It isn't ruined by any means. One girl, who expected to become a bride shortly after she received her degree at college, was saving her couch because the cedar lining was so handy for linens and frocks. But the bespotted exterior of faded green denim caused her much annoyance. A friend suggested recovering the whole thing in tones to match the girl's boudoir. Now it is a charming affair in delft blue-and-white striped chintz, with a full, ruffled valance at the front, and oval pillows made from left-over pieces of the same.

GOOD JOKES



Extremes Meeting.

"That was a remarkable idea of contrasts the animal painter had in his latest zoo picture."

"What was it?"

"He painted a laughing hyena standing under a weeping willow."

Smokeless Conflagration.

Omar—Hello, Heiny! Are you still working at old Skinner's store?

Heiny—Not me. Old Skinner had a big fire last week.

Omar—Much of a loss?

Heiny—I should say so. He fired me.

His Finish.

Trotter—When I left here five years ago old Graspit was worth nearly half a million. How much has he now?

Homer—Not a dollar.

Trotter—What! Did he fail?

Homer—Not exactly. He died.

Strange Behavior.

Doctor—I regret to inform you, Mrs. Tightwad, that I fear your husband is suffering from softening of the brain.

Mrs. Tightwad — Goodness gracious! What makes you think that?

Doctor—Well, he insisted on paying me in advance.

Sparing His Pride.

"Pa, why do you always send me out of the room when you and mother are about to have an argument?"

"I hate to tell you, son."

"But I'd like to know, pa."

"Well, I guess it's because no man likes to accept defeat in the presence of his son."

The Real Thing.

Little Lemuel—Say, paw, what is faith?

Paw—Faith, son, is something that will induce a bald-headed man to buy a bottle of hair restorer from a druggist who hasn't a hair on his head.

His Start.

"I hear, Miss Gladys, that your brother is ambitious to break records."

"Well, he's begun practicing with the most expensive ones we bought for our Victrola."

WANT TOO MUCH HAPPINESS

Trouble With Humanity Is That It Would Have Its Enjoyments Come in Chunks.

We are told that happiness comes by pieces, and that it is these small bits linked together that make our lives worth while. Some of us are not content to take our happiness by degrees or at intervals. We want it all the time in big pieces, and if we cannot have it that way we think we are deprived of our natural rights and look upon ourselves as injured beings. It is a rather singular expression of human nature how happiness affects the individual. With some of us it makes us friendlier toward others and anxious that they should experience like joys; with others it makes us too satisfied with ourselves to think very much of our neighbors. Perhaps those of us who know what the joy of living means have experienced both of these attitudes at different periods of our lives and are in position, therefore, to appreciate a varying viewpoint, but even so it is only after we lose something of that joy of living and have found out for ourselves that there are shadows which no amount of sunlight can disperse that we can readily appreciate the blessing of whatever happiness may find its way into our lives. The little things that count so much in our intercourse with each other are not always regarded as highly as they should be, and for this reason we pass by much that would give us joy if we only knew how and where to find it.

His Good Qualities.

"How do you like your new minister?"

"Very much, indeed. He's the right sort. One of those 'man-among-men' ministers, you know. Comes over to the house occasionally and smokes a pipe; plays on our baseball team; good at tennis and golf and seems to believe in getting pleasure out of this life."

"I see."

"Yes, and he's interested in the things we laymen are interested in. He discusses the problems of the day. I tell you, he's a fine fellow."

"I know, but what sort of sermons does he preach?"

"Well, that I can't tell you. I haven't been over to hear him preach yet."—Detroit Free Press.

STAR OF THE MOVIES

Miss Grace Darmond, Well-Known Film Actress Who Is Being Starred in a New Serial.

Beauty Sleep Brings A Clear, Fresh Skin

There are a few fundamental laws in regard to a clear, fresh skin. The first of these is sleep, and, say what you may, there is no better adage in the English language than the old rhyme of "Early to bed." Too little sleep leaves its traces on the face as clearly and definitely as if some demon or nightmare had written it there with pen and ink for all the world to read. The eyes are heavy and dull, the mouth sagging, faint lines appear around the mouth and eyes, and the skin, instead of being fresh and pink, is of a grayish hue. Not only is there a physical effect, but the mental result produces irritability, a nagging temper and a nervousness which go far toward producing wrinkles and "crows' feet."

It should be remembered that one hour of sleep before midnight is worth two after. Eight hours' sleep is sufficient for the average adult; those who do brain work require more. Let your room be filled with fresh, cold air—the colder the better—and see that the bedclothing is neither too heavy nor too light.—Sperry's Magazine.

Around the World.

Plans are under way for establishing wireless telephone system in several cities in Spain and to connect with Spanish vessels and Spanish colonies in Africa.

Development of the incandescent lamp represents an improvement of 1,075 per cent in the amount of light obtainable from a given consumption of electricity.

In a machine invented in England to test the durability of textiles, dull-edged blades are rubbed by an electric motor against the fabrics until they are worn through.

Statistics gathered from colleges throughout the country show that residents of the United States, both men and women, are growing taller, more robust and stronger.

French scientists have decided that carrier pigeons are influenced by magnetism and that, with the growth of wireless telegraphy, much less dependence can be placed on them.

Medicine river, Fort Sill reservation, Oklahoma, has the most unusual crossing in the United States. A concrete roadway constitutes the ford across the river and water flows over it continuously.

We imagine there are a lot of halos in heaven that won't be called for.

The man who always gets what he wants usually makes a noise like a bank roll.

Horses are not partial to wild oats, which may explain why they possess horse sense.

Eventually a man quits wandering around with a chip on his shoulder.

Single gardenias are seen now and then on hat brims.

San Francisco thus far this year has erected 18 new factory buildings, valued at $4,150,000.

A clock is wound up to make it run, but a business is wound up to stop it.

The milk of human kindness would be much richer if it wasn't skimmed so often.

With One Exception.

"I presume Dubwaite thinks his little son is just about the smartest boy ever born?"

"Oh, no. Dubwaite remembers that he was a youngster once."

Its Farewell Stunt.

Scribbles—Here's one of my jokes in this patent-medicine almanac.

Dribbles—So? Then it must have passed the age limit.

STOP! CALOMEL IS QUICKSILVER

It's mercury! Attacks the bones, salivates and makes you sick.

There's no reason why a person should take sickening, salivating calomel when 50 cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.

Children and grown folks can take Dodson's Liver Tone because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more biliousness, constipation, sluggishness, headache, coated tongue or sour stomach. Your druggist says if you don't find Dodson's Liver Tone acts better than horrible calomel your money is waiting for you.—Adv.

ODDITIES OF FIGURE NINE

Writer With Spare Time on His Hands Has Discovered Some Really Interesting Facts.

There are some curious facts and fancies connected with numbers. The number 9 is, perhaps, the first as regards such experiments, although number 7 is more prominent in literature and history. When you once use it you can't get rid of it. It will turn up again, no matter what you do to put it "down and out."

All through the multiplication table the product of 9 comes 9. No matter what you multiply with or how many times you repeat or change the figures, the result is always the same.

For instance, twice 9 equals 18; add 8 and 1, and you have 9. Three times 9 equals 27; 2 and 7 make 9 again. Go on until you try 11 times 9—99. This seems to bring an exception. But add the digits—9 and 9 make 18; and again, 1 and 8 make 9. Go on to an indeterminable extent and the thing continues. Take any number at random. For example, 450 times 9 equals 4,050, and the digits, added, make 9 once more. Take 6,000 times 9, equals 54,000, and again you have 5 and 4.

Take any row of figures, reverse the order, and subtract the less from the greater—the total will certainly always be 9 or a multiple of 9. For example, take 5,071—1,705 plus 3,366. Add these digits and you have 18, and 1 and 8 make familiar 9.

You have the same result, no matter how you raise the numbers by squares and cubes.

One more way is given by which number 9 shows its strange powers. Write down any number you please, add its digits, and then subtract the sum of said digits from the original number.—Exchange.

Roman Pottery in England.

Roman pottery was recently discovered in London. When the old general post office in St. Martin's-le-Grand was demolished a large series of Roman rubbish-pits was disclosed. The lowest portions of one hundred and twenty of these were carefully excavated. The 'finds" included a few whole pots and many thousands of fragments of Samian and coarse pottery, besides building materials, whetstones, beads, knives, coins, and other small objects. It has been possible to assign dates to most of the holes between A. D. 50 and 200. By the association in the same hole of datable and undatable pottery light has been thrown upon many types of the latter. Last summer, while the buildings 3-6, King William street, were being demolished another series of five large Roman pits was uncovered. From the fragments thus obtained nine Samian vessels of the first century have been pieced together, and are now in the Guildhall Museum.

In Advance.

"I want a cent's worth of candy."

But the cent was missing. Hole in Arthur's pocket. The storekeeper told him to go out and find his penny. After a short time he came back and said:

"Maybe you'll find it when you sweep."

"Well, if I do, I'll give it to you."

"Do you sweep tomorrow?"

"Yes, sir."

Arthur looked at the storekeeper as much as a half a minute and said:

"All right, I'll take the candy today."

On Duty.

Young George sat on the top rail of a fence kicking his heels against a lower rail. Along came young Henry.

"Let's go down to the creek and have a swim," suggested Henry.

"Can't," said George. "I've been put out here to mind Aunt Sallie's and Aunt Hattie's children."

Henry looked around wonderingly. There were no children in sight.

"Where are they" he asked.

"Blamed if I know," said George.

I'm Sorry; I Was Wrong

There may be virtue in the man
Who's always sure he's right,
Who'll never hear another's plan
And seeks no further light;
But I like more the chap who sings
A somewhat different song,
Who says, when he has messed up things:
"I'm sorry; I was wrong."

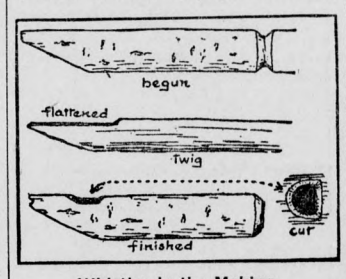
It's hard for anyone to say
That failure's due to him—
That he lost his fight or way
Because his lights burned dim.
It takes a man aside to throw
The vanity that's strong,
Confessing: "'Twas my fault, I know;
I'm sorry; I was wrong."

And so, I figure, those who use
This honest, manly phrase,
Hate it too much their way to lose
On many future days.
They'll keep the path and make the fight
Because they do not long
To have to say, when they're not right:
"I'm sorry; I was wrong."
—Richmond Times-Dispatch.

Every Boy Can Have Whistle—Here's How

When off to the park or country and loafing along a shady stream, watching a boat drift idly or a fish-line cork rest upon the still surface, it is a fine time to employ an hour or so in making those delights to every boy, bark and plug whistles. The skillful boy learns the method and his first effort at least toots in a fashion, while others may hardly get a whisper out of their initial attempt. Later perfection of method and getting the knack result in a shrill blast that endangers one's eardrums.

Cut a straight willow twig about the length and twice the diameter of a lead pencil, one end of which is cut bevel, as here shown. At three or four inches from the end cut through the bark all around; this will be the length of the whistle. This section should be free of knots or roughness. On your knee, or better, on a flat wooden surface, hammer the bark



Whistles in the Making.

smartly, turning it so as to strike every portion; use the back of your knife, a stout piece of stick, or a smooth stone.

This hammering separates the fiber from the sapwood, and with a little gentle twisting and pulling the bark will slip off the twig. Cut the twig the same length as the bark and at the bevel end flatten one side, as shown. About an inch back of the end cut a thumbnail-shape hole in the bark to come above the flat side of the twig and insert the twig. Then blow.

Some Things That Are New.

Experts have listed more than 10,000 varieties of orchids.

A water-cooled motorcycle has been invented by an Englishman.

Among the jewelry novelties is a combination penknife and lead pencil.

The six state capitals of Australia have been connected by wireless telegraphy.

Concealed under the flap of a new cap for men is a pocket for money or valuables.

The world's greatest wireless station has been built in Italy, powerful enough to communicate with North and South America when similar stations are erected on this side of the Atlantic.

To facilitate rapid writing there has been invented a metal device to be clamped to the little finger and with a shelf on which to rest the next finger and slide over a surface written upon.

To insure the owner of a private shaving cup kept in a barber shop that he is its only user there has been invented a paper cap to cover it, which cannot be removed without breaking a seal.

In the last few years Moscow has been increasing in population more rapidly than at any time in a century and, if the present rate be continued, it will have more than 2,000,000 residents in 1920.

Facts and Figures.

United States last year produced 1,731 tons of asbestos.

Alaska's 1915 mineral production was valued at $32,854,229.

Virginia, in 1915, mined 8,122,596 tons of coal, valued at $7,962,934.

American exports of canned salmon are valued at $7,000,000 yearly.

Czar of Russia's income is estimated to be $80 every 60 seconds.

President Wilson has opened to settlement 148,676 acres of land in Salinas valley, California.

Backache? Run Down? Tired? Clean the Kidneys with Hot Water and "Anuric"

When run-down after a hard winter—when life indoors has brought about a stagnant condition in the circulation—most everyone is filled with uric acid—especially is this so of people past middle age. This uric acid in the blood often causes rheumatism, lumbago, swelling of hands or feet, or a bag-like condition under the eyes. Backache, frequent urination or the pains and stiffness of the joints are also often noticed. Dr. Pierce says that everyone should have a good sweat every day—should drink plenty of pure water and exercise in the open air as much as possible. This helps to throw out the poisonous uric acid thru the skin and the "water." But for such persons as are past middle age it's often impossible to do this and lime salts are deposited in the arteries, veins and joints, causing all kinds of distressing conditions. An antidote for this uric acid poison is to take hot water before meals and "Anuric." Ask your druggist for Doctor Pierce's Anuric, or send Doctor Pierce's Invalids' Hotel and Surgical Institute in Buffalo, N. Y., a dollar bill for a full treatment, or ten cents for a trial package.

"Anuric" is a recent scientific discovery by Dr. Pierce. "Anuric" drives the uric acid out of your body. It is a uric acid solvent so effective that it eliminates these poisons, cleanses the system, allows your over-worked kidneys to resume their normal functions, and just a few days' treatment with "Anuric" will convince you because it brings lasting relief to your painful, aching rheumatic joints—no more backache or dizzy spells. Try it now and be convinced!

SYMMETRY OF THE FEET

As Ugliness Disappears Pedal Extremities of the Human Race Become Beautiful.

Darwin points out, in his great aggregation of facts called the "Descent of Man," that beauty tends to increase and ugliness to disappear. Study of past family histories, archeology, the transmission of hereditary characteristics and scientific observations show that the types of feet which are rapidly disappearing from the earth are the large and horrid-looking ones, whereas the small and pretty feet are rapidly increasing, the New York Sun says.

The Zulus have one type, the Africans another and the Greeks have the ideal type. In America and England there is a mixture of all types; the Germans have a type of foot like the Zulus. This one is also rather too common in Chicago.

Repeated observations upon 3,000 people show that there is a vast improvement in the average symmetry and beauty of the human foot, as compared with measurements, portraits, pictures, statuary and excavations of the middle ages, pre-Christian times, Egyptian and Babylonian days and further back.

The feet of unborn and newborn babies seem to retain some of the contour of those out of date and far from ideal feet.

The beautiful, small and symmetrical foot which the human race is approaching, but which is as yet unknown in any race or any Greek statue, is shown in the great painting by Burne-Jones, called "Sibylla-Depphica." The foot is perfect in symmetry, tiny and slim; the toes are long and slender, particularly the second toe, which is longer than the big toe.

Obviously this beautiful type is soon to be approached if the researches of these anthropologists are correct.

To Break In New Shoes.
Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, aching, swollen feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.—Adv.

BRAZIL A LAND OF PROMISE

Tremendous Possibilities That the Future Holds for the Great Republic to the South.

Brazil is not Spanish America. It is Portuguese America, and the republic of Brazil is distinct and separate. No one unacquainted with Brazil seems to realize what a tremendous area it represents and to confuse it with the west coast and even the River Plate is to make a commercial mistake.

In the very first place, experience with Spanish America does not necessarily carry an intimate acquaintance with Portuguese America. Brazil by itself deserves all the time a man can give to it. For instance, there is south Brazil, which includes the states of Rio Grande do Sul, Santa Catharina and Parana, and the new railroad which crosses them is opening up a good territory for future settlement. Rio Grande do Sul and Puerto Alegre do not control the whole of this interior.

It must be studied with the same purpose which was given to Washington and Oregon a generation ago. The climate is not dissimilar, nor, in a broad sense, are the civilizing influences at work very dissimilar. It is not unlike parts of Peru, Ecuador and Bolivia.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.

Gill, McGill, Gillespie.

The name of Gill is probably older than that of McGill as the prefix Mac signifies "son of," and the name would therefore in olden times be borne by one whose father was a Gill. It is extremely doubtful if there is any connection at all between the above names and that of Gillespie. In Gaelic this name is Gilleasbuig, translated in English by Archibald. For example, the earl of Argyll, who was famous in the wars of the seventeenth century, was known as Gillespie Grumach or "Archibald the Grim."

Knew What He Had.

A newsie saw the driver of a certain make of motor car throw a blanket over the hood of the car. The boy had heard all of the jokes about this particular brand of car and decided to take a shot at it himself.

While the man thus carefully tucked the blanket down around the hood the youngster looked at him grinningly and remarked:

"Oh, you don't need to try to hide it. I know what you've got."

DAISY FLY KILLER

Placed anywhere, it kills and prevents all flies. Neat, clean, ornamental, convenient, cheap. Lasts all season. Made of metal, can't spill or tip over; will not soil or injure anything. Guaranteed effective. Sold by dealers, or 5 sent by express prepaid for $1.

Notice to Contractors and Builders

BIDS FOR THE CONSTRUCTION and completion of the Campbell Grammar School to be erected at Campbell, Santa Clara county, California, according to the plans and specifications on file at the office of F. D. Wolfe, Architect, Rooms 93-96 Auzerais Bldg., San Jose, California, and with J. D. Blaine at Mr. Blaine's Store, Campbell, California, will be received up to 7:30 P. M. on the 12th day of August, 1916.

Said bids must be accompanied by a certified check of not less than ten per cent (10%) of the amount of the bid presented and must be made payable to Mrs. Meda L. Waite, Clerk of the School Board. Said check will be forfeited in case the successful bidder fails to enter into contract and to give a good and sufficient surety bond within ten days after the contract is awarded to him.

Bids must be sealed and endorsed "Bids for the Campbell School Building" and must be made upon blank forms which may be secured at the architect's office or the Trustees of the Campbell School District.

The Board of Trustees reserve the right to reject any and all bids.

By order of the Board of Trustees.
3 MRS. MEDA L. WAITE, Clerk.

Notice: Probate of Will

In the Superior Court of the State of California, in and for the County of Santa Clara

In the Matter of the Estate of SARAH YOUNG, Deceased. — Notice of Time Set for Probate of Will, and of Hearing Application for letters of Administration with Will Annexed

A document purporting to be the last Will and Testament of Sarah Young, deceased, having on the 19th day of July A. D. 1916, come into the possession of said Superior Court and a petition for the probate thereof, and for the issuance of letters of administration with Will annexed to Ellen L. Adams having been filed by said Ellen L. Adams with me, Clerk of said Court:

NOTICE IS HEREBY GIVEN that Friday the 4th day of August, A.D. 1916, at 10 o'clock A.M. of said day in Department 2 at the Court room of said Court at the Court House in said City of San Jose, County of Santa Clara, State of California, has been set as the time and place for hearing the petition for the admission of said Will to probate, and the application of said Ellen L. Adams for the issuance to her of letters of administration, with the Will annexed, when and where any person interested may appear and contest the same, and show cause, if any they have, why said petition should not be granted.

Given under my hand and seal of said Superior Court this 19th day of July A.D. 1916.

(SEAL) Henry A. Pfister, Clerk.

Card of Thanks

We desire to express our sincere thanks to our friends who so kindly assisted us during our bereavement and also for the floral offerings.
JAS. FABLINGER AND FAMILY.

IS Russia paying Japan for ammunition by selling her railroads? At the present rate of firing a transcontinental line would not last more than a few weeks.

THE British and Germans are not more violently opposed than the reports from London and Berlin.

GOVERNOR HIRAM JOHNSON fired the first gun in the U. S. senatorial race in California, and it did the work of a 42, being heard all over the state. In his platform he declared for the support of Hughes for president; for equal suffrage for federal action; for preparedness internal as well as external. This is a sound platform which will be hard to break down and the Californians want just that sort.

Selling Organization

The Orchard City Grange held open meeting at its hall Tuesday evening for the purpose of hearing of the Apricot and Prune Growers selling proposition which is well under way in this county. E. K. Clendenning was chosen chairman and Ralston Alison secretary for the evening, Mr. Bone and Mr. Merrill of the information bureau gave some very good arguments in favor of the organization of such a corporation. One of the chief points brought out was the fact that the other fruit growers are organized and it is the only salvation for our fruit men to organize.

During the evening a number of local growers spoke in the interest of the movement and as a result at the close of the evening 22 growers had signed the agreement. Many of the growers are out urging their neighbors to join in and by the enthusiasm displayed the promoters look for a successful canvass.

Methodist Church Notes

Bishop Eveland, our chief pastor in the Phillipines, came to his death while on vacation in Pennsylvania this week.

The pastor will speak Sunday morning on "Christian Viticulture," and in the evening on "Preparedness."

The Epworth League will meet as usual at 6:30 Sunday evening.

The Official Board will meet at the close of the mid-week service Wednesday evening. This is the last meeting of the Board before the end of our fiscal year, Sept. 1st. We should have a full attendance.

Our Fourth Quarterly Conference will be held Thursday evening, Aug. 3rd, at 7:30. All the heads of departments in the church should be prepared to report at this meeting concerning the work under their control.

All secretaries of church organizations, and any others having in their keeping records of meetings or other things of the various societies (aside from financial accounts, which will be audited after the close of the year), are requested to bring such books to the church Sunday that they may be inspected by the proper committee prior to the Q. C. Thursday evening.

Congregational Church

"The Friendly Church just around the Corner."

At the Missionary Conference at Asilomar June 30-July 10 there were 110 registered delegates, 28 being Congregationalists.

The Pastor is at Yosemite Camp Curry at the State Conference. Dr. J. K. Browne of Harpoot, Turkey, will speak Sunday morning next. No evening service. C. E. at 7 o'clock with Miss Ruth Cowles as leader.

The Pastor will be in his pulpit again Aug. 6. That evening will be shown the great set of slides on "Turkey and the Great War."

We are very fortunate in having Dr. Browne as our pulpit supply for next Sunday. Tell others of the opportunity. If you have no church home you are invited to worship with us.

GEO. E. ATKINSON, Pastor.

Hon. Frank H. Benson was in Campbell Tuesday on campaign business. His candidate card appears elsewhere in these columns. Mr. Benson has made a good representative for this district in the past and is deserving of the solid support of this community.

FOR GOOD SILAGE.

Any crop, to make good silage, should be harvested at the proper stage of maturity. Very seldom will corn and cane be ready for silage at the same time. Corn is usually ready several weeks before cane has reached the proper stage of maturity. The mixing of the two crops under these circumstances would not increase the value of the resulting silage, and, in addition, the labor of filling would likely be increased. The best results will come from putting the corn into the silo when it has reached the proper stage. This will be while the stalk and leaves are still green and when the ears have reached the stage when they have begun to dent or become hard.—Kansas Farmer.

And Sand.

"What do you consider the best foundation for success in business?"
"Rocks."—Boston Transcript.

Local and Personal

Choice Skinner Seedling apples. 50c per box. Phone 28F5.

Miss Mabel Masciorini spent part of last week at Santa Cruz.

Mrs. L. J. Spears and Miss Spears were guests of Mrs. Spears' sister, Mrs. M. J. Wilson, for the week-end.

Fancy bartlett pears for sale. Large ones for canning, small for pickling. Phone Campbell 4L. A. B. Townsend.

Mrs. R. A. Logan and grandson, Clark Lawrence, of Palo Alto, are visiting Mrs. Logan's daughter, Mrs. A. J. Farley, and family.

Mrs. Wm. Turnbull and Mrs. Linn of San Francisco are visiting S. G. Rodeck family this week. The party went to Niles Canyon Wednesday for a picnic.

John Spencer returned recently from Lyons, Kansas, where he went to take the remains of his late wife. He is now living on South Second Street, San Jose.

The W. L. Beacock family left yesterday morning on their long auto trip. They go south to San Diego and will spend a month visiting in the state. Later they will start by auto for the East coast.

Robert Dunn and wife are enjoying city life at College Park these days, Mr. Dunn having traded for the new home. However he expects to build on his other ranch and move back to Campbell later.

The Campbell Athletics joined the Mission League base-ball organization Wednesday evening taking the place of Monterey. The opening game in the league will be played at Salinas Sunday. The game with Los Gatos has been canceled.

"Come, come, don't be afraid of the leap in the dark. Be brave." "It aint that which grips my soul and makes me weep," said the dying man hoarsely. "It's the fact, they aint goin' to be any of King's ice-cream in the land whereto I'm driftin'."

Pastor Called To New Field

The Rev. G. E. Atkinson has resigned as pastor of the local Congregational church. He handed his resignation to the official board at a called meeting, after service Sunday evening.

This action was a complete surprise and shock to the congregation and community as he and his wife have a host friends who will greatly miss them. Altho the Martinez charge to which he has been called is not so large as Campbell church, yet Mr. Atkinson thinks that there is greater opportunity to for extending the work.

During their thirteen years' residence and faithful service here Mr. and Mrs. Atkinson have built up the church membership and societies, and have won many staunch friends who wish them all success and happiness in their new field.

A. G. Williams Visits Old Home

A. G. Williams left yesterday for an extended trip East visiting at various points. He is accompanied by his son, Worthen, who met him at Oakland. They will go to Broomfield, Colorado, where they will visit the John Gratton family for two weeks, going on to Grinnell, Ia., their old home. Mr. Williams is planning to go back to his birth-place in Solomon county, New Hampshire but may not. They will be gone three months, spending most of the time at Grinnell.

During Mr. Williams' absence, Leland Gratton will remain here, Mrs. Sherer keeping house for him.

How's This?

We Offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any transactions made by his firm.

NATIONAL BANK OF COMMERCE, Toledo, O.

RAILROAD WAGES

Shall they be determined by *Industrial Warfare* or *Federal Inquiry?*

To the American Public:

Do you believe in arbitration or industrial warfare?

The train employes on all the railroads are voting whether they will give their leaders authority to tie up the commerce of the country to enforce their demands for a 100 million dollar wage increase.

The railroads are in the public service—your service. This army of employes is in the public service—your service.

You pay for rail transportation 3 billion dollars a year, and 44 cents out of every dollar from you goes to the employes.

On all the Western railroads in 1915, seventy-five per cent of the train employes earned these wages (lowest, highest and average of all) as shown by the pay rolls—

	Passenger		Freight		Yard	
	Range	Average	Range	Average	Range	Average
Engineers	$1747 3094	$2195	$1537 3076	$2071	$1056 2445	$1378
Conductors	1543 2789	1878	1454 2933	1935	1151 2045	1355
Firemen	1053 2078	1317	751 2059	1181	418 1552	973
Brakemen	854 1719	967	874 1961	1135	862 1821	1107

The average yearly wage payments to *all* Western train employes (including those who worked only part of the year) as shown by the 1915 payrolls were—

	Passenger	Freight	Yard
Engineers	$2038	$1737	$1218
Conductors	1772	1624	1292
Firemen	1218	973	832
Brakemen	921	1000	1026

A 100 million dollar wage increase for men in freight and yard service (less than one-fifth of all employes) is equal to a 5 per cent advance in all freight rates.

The managers of the railroads, as trustees for the public, have no right to place this burden on the cost of transportation to you without a clear mandate from a public tribunal speaking for you.

The railroads have proposed the settlement of this controversy either under the existing national arbitration law, or by reference to the Interstate Commerce Commission. This offer has been refused by the employes' representatives.

Shall a nation-wide strike or an investigation under the Government determine this issue?
